

**THE EUROPEAN COMMISSION PORTAL
www.elearningeuropa.info
LAUNCHES AN EUROPEAN COMPETITION
CONCERNING E-LEARNING IN PRACTICE**

**EUROPEANS ARE ENCOURAGED TO SHARE THEIR PERSONAL
EXPERIENCE WITH E-LEARNING AND CAN WIN A TRIP TO BERLIN,
VISITING THE EDUCA ONLINE FROM 3.-5.12.2003**

From the now on until the 21.11.2003 the European Commission calls upon Europeans to share their experience regarding E-Learning. Participants are asked to send a short paragraph (maximum 30 lines) describing and explaining their attitudes and opinions, evaluating their experiences. What did they learn? What did they like/dislike about it? In which way does E-Learning seem to be an advantage/disadvantage compared to traditional learning, and what advice would they give to others.

By means of this competition, the European Commission is looking for information that helps to develop a better understanding of people's perception of E-Learning, in order to improve the overall implications and situation in Europe.

All participants will enter a draw and have equal chances of winning a trip to Berlin to join the Educa Online, that takes place the **3.-5.12.2003** (*Price includes flights, accommodation and conference tickets*).

The closing date to enter the competition will be the 21. November 2003. The winner will be contacted by email before 27. November 2003. A summary of the most interesting experiences will be published on the portal in December. This article will also be sent to all participants in the form of a special newsletter.

Those wishing to take part should be resident in the European Union and registered as users of the elearningeuropa.info portal. If you wish to register, please go to:

www.elearningeuropa.info

The elearningeuropa.info portal gathers information on the use of multimedia technologies and the Internet for education. A major goal of the portal is to enhance co-operation and exchange among all players in the field, by offering various services and resources. The portal relies on the active participation of a broad range of users.
